You can sprint faster than the rocket you fire ! Anyway ...

A few improvements like the ability to climb the giant zombies bodies would be nice, as well as a more edited level.

This is still a good game to kill time with, recommended.. dont buy this ever. one might say a journey has ended, but i may say it has just started. in a nutshell lets get this game rolling for some sick achivements and all the other stuff that gaben provides us.

to great power the PCMS will raise and stop the need to tell people why there xbox sequel console will never get close too the price of freedom . hm he what where was i yeah other all not a very great piece of art. but may i say we might not be the first on mars but we have cake.. Intentionally bad or no, this game still sucks.

If it is supposed to be a joke, there isn't anything funny in it.

Just a bog standard GameGuru waste of time.
